# Plan

- ▶ Deployment scenario
- ▶ Baseline scenario
- ▶ REST API
  - ApplicationEntity
  - Container
  - ContentInstance
  - Subscription & Notification
  - Discovery features

# OM2M REST API

## ► Deployment example:

- IoT devices – IoT Gateway – IoT Server – IoT Application
- IoT device – IoT Gateway : IoT specific technology
- IoT Gateway – IoT Server : IP Technology
- IoT Server – IoT Application : IP Technology

## ► Deployment example:

# OM2M REST API

## ► Important resources:

- **CSE** : oneM2M middleware node
  - A set of common services deployed within the same software entity
- **AE** : Application Entity
  - A logical representation of a device, application, process
- **CNT** : Container
  - A way to organize “data” in the oneM2M resource tree
- **CIN** : Content Instance
  - Instance of the “data” in a container
- **SUB** : Subscription
  - Description of a subscription to any modification of a resource
- **NOTIFY** : Notification
  - The description of the resource update that is transmitted to subscribers.
